

We elevate the
extraordinary

Designing the vertical journey

COLLECTION **ORONA NEXT**

The lift is not just a means of reaching a destination: it is an experience conceived through space. Light, materials and the composition of the environment create an immersive atmosphere, where every journey conveys calm and harmony. It is about turning mechanical movement into a human experience.

Designing a vertical space means imagining how that moment is lived, how an everyday journey is transformed into a moment of calm, safety, precision and beauty.

And thanks to our materials and finishes, you can make the experience unique.

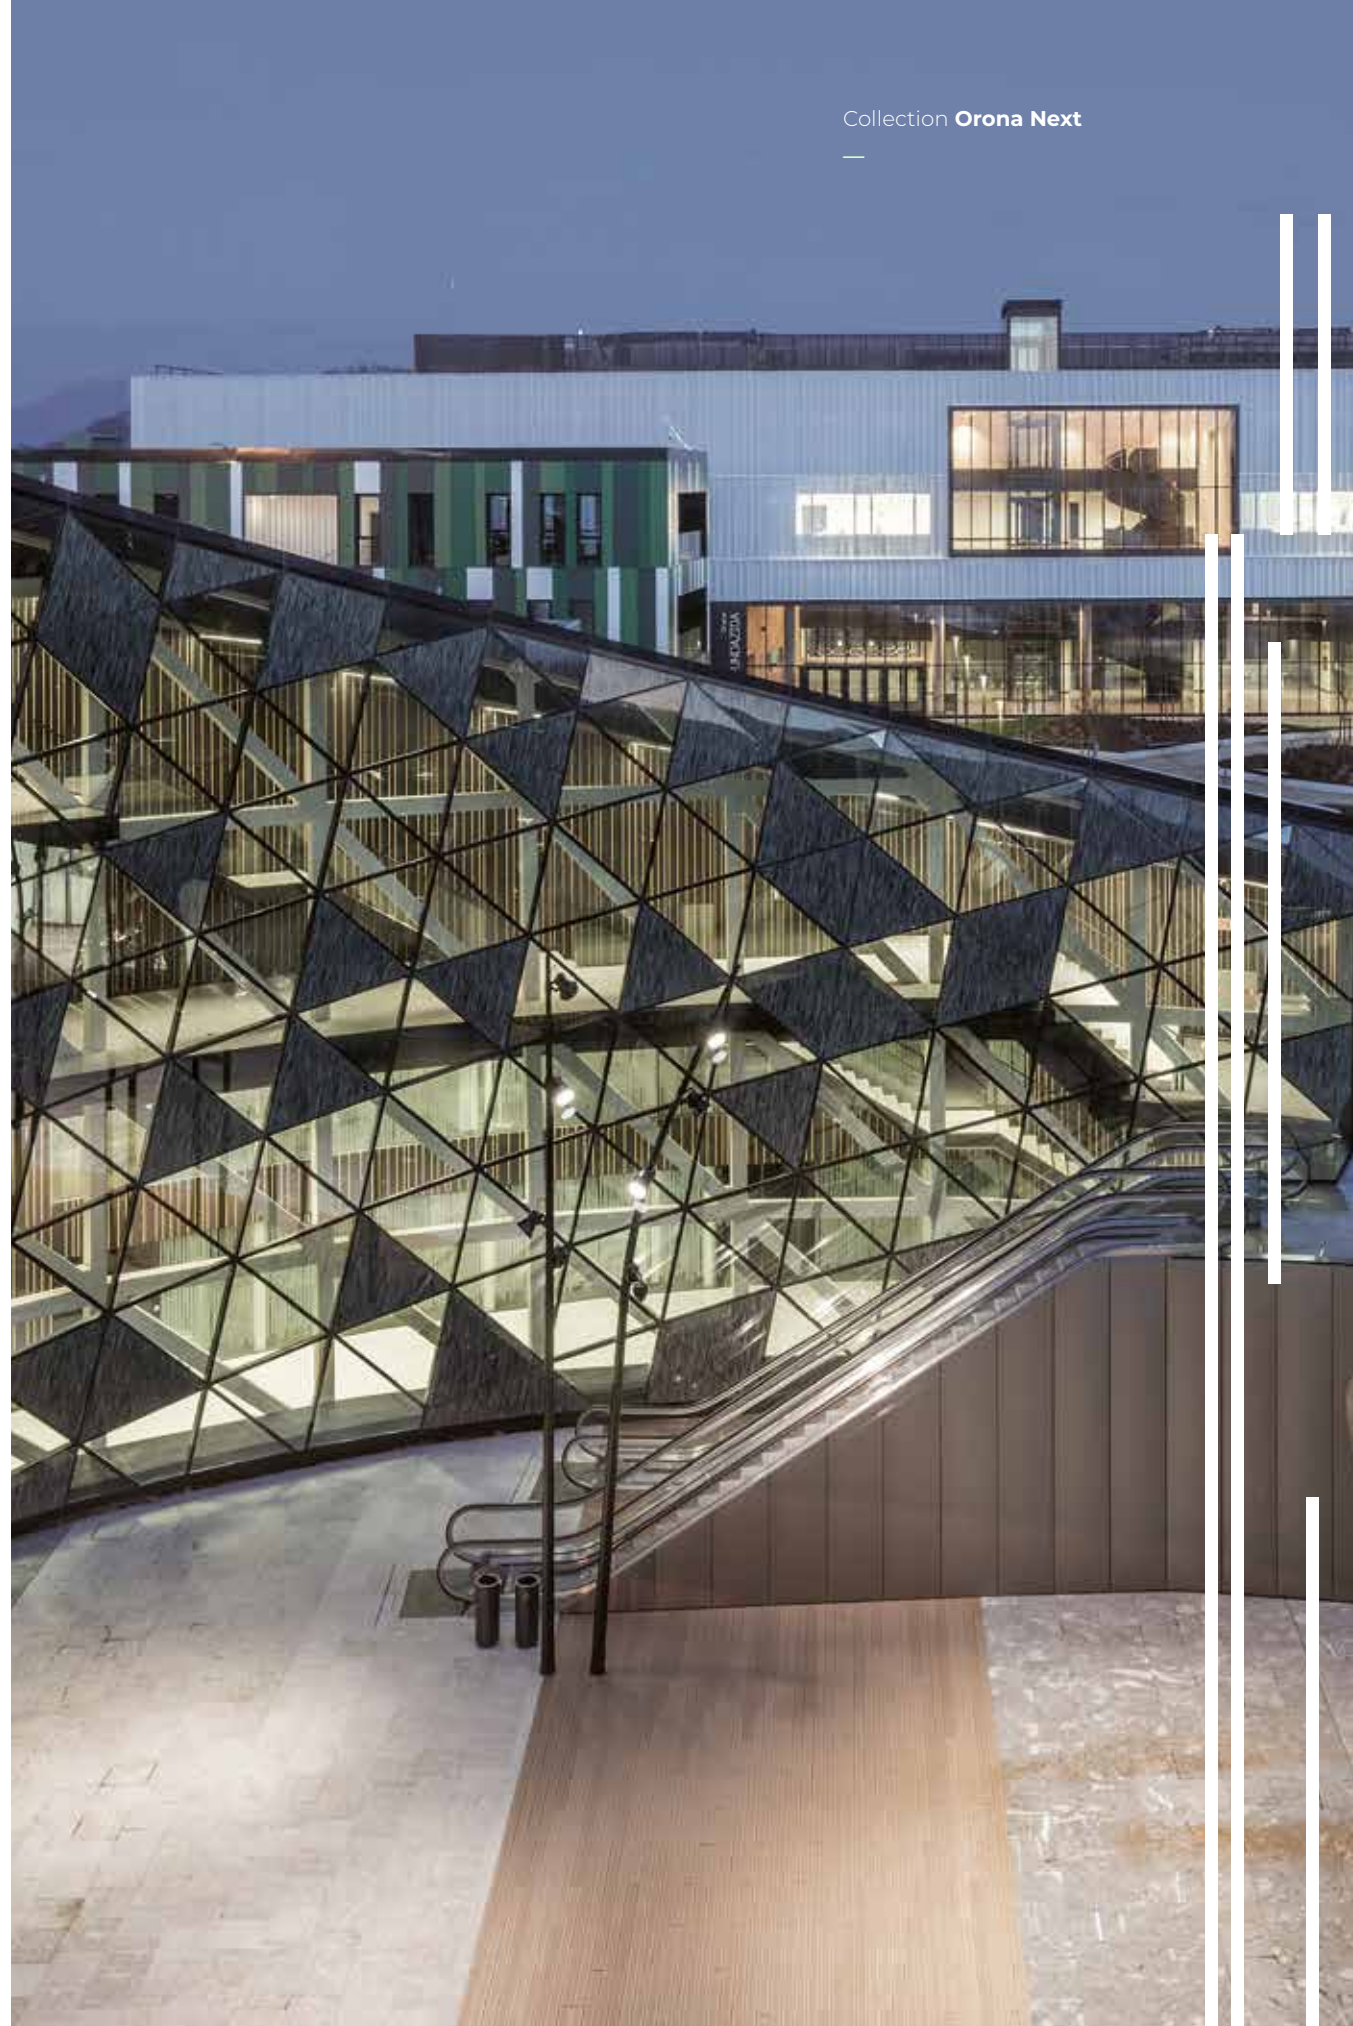

The place where ideas develop...

ORONA IDEO IS THE PLACE WHERE IDEAS, INSPIRATION AND FUTURE INNOVATION MEET.

Orona Ideo and our production plant are the places where the defining values that shape Orona's strategy coexist. And this space is much more than a set of facilities; it is the place any idea or project needs in order to grow and become consolidated.

- › More than 7,000 professionals
- › No. 1 in production capacity in Europe for complete lifts
- › More than 60 years' experience
- › Direct presence in 14 countries and export to over 100 countries
- › 2 production plants
- › 2% investment in innovation

...and where we make them happen.

THE PLACE WHERE VALUES GROW.

Innovation

creativity, ambition, vision... our sustainable innovation approach, created to develop projects related to energy, is carried out at Orona Innovation Center.

Proactivity

is about solving the challenges of mobility through our product and service platform.

Closeness

to customer service and product design for the user. Closeness is the way we express that caring for people comes first; to this end, we have the uninterrupted service of the Orona Contact Centre.

Community

is the people around us, it is the environment in which we move, a habitat we serve and with which we collaborate to create the future without forgetting who we were. It is our organisational model, committed to people, and whose benchmark is the activity carried out by Orona Foundation.

Materials inspire

Materials evoke emotion

Materials determine the way a space is perceived and experienced. Steel, wood, glass and stone bring warmth, quality and character. In a lift, an environment where everything is within sight and touch, these decisions take on particular relevance: every surface makes a decisive contribution to the experience.

At Orona, we offer a selection of finishes based on noble materials designed to integrate naturally into any architectural project. It is not only about aesthetics, but about coherence: ensuring that it engages with the building, its identity and the intention behind the design.

This variety of options opens up a true space for creative freedom. The ability to choose, combine and adapt allows the lift to stop being an isolated element and become an extension of the project. A space that reflects the personality of the building and of those who inhabit it, where design, materiality and experience come together to elevate architecture both functionally and sensorially.

Steel

Wood

Stone

Glass

Three atmospheres, three ways to feel space

Each building has its own character, and each lift expresses it through its finishes, proportions and atmosphere. That is why we have imagined 3 ambiances that range from the natural serenity of Harmonia, through the dynamic character of Innova, to the expressive sophistication of Rinaccia.

Three aesthetic worlds for three types of experience. And, from them, a starting point: the freedom to create unique combinations and explore materials.

Each one of them is an invitation to design vertical spaces with their own identity, in tune with the architecture of the building.

10 HARMONIA

20 INNOVA

30 RINACCIA

HARMONIA

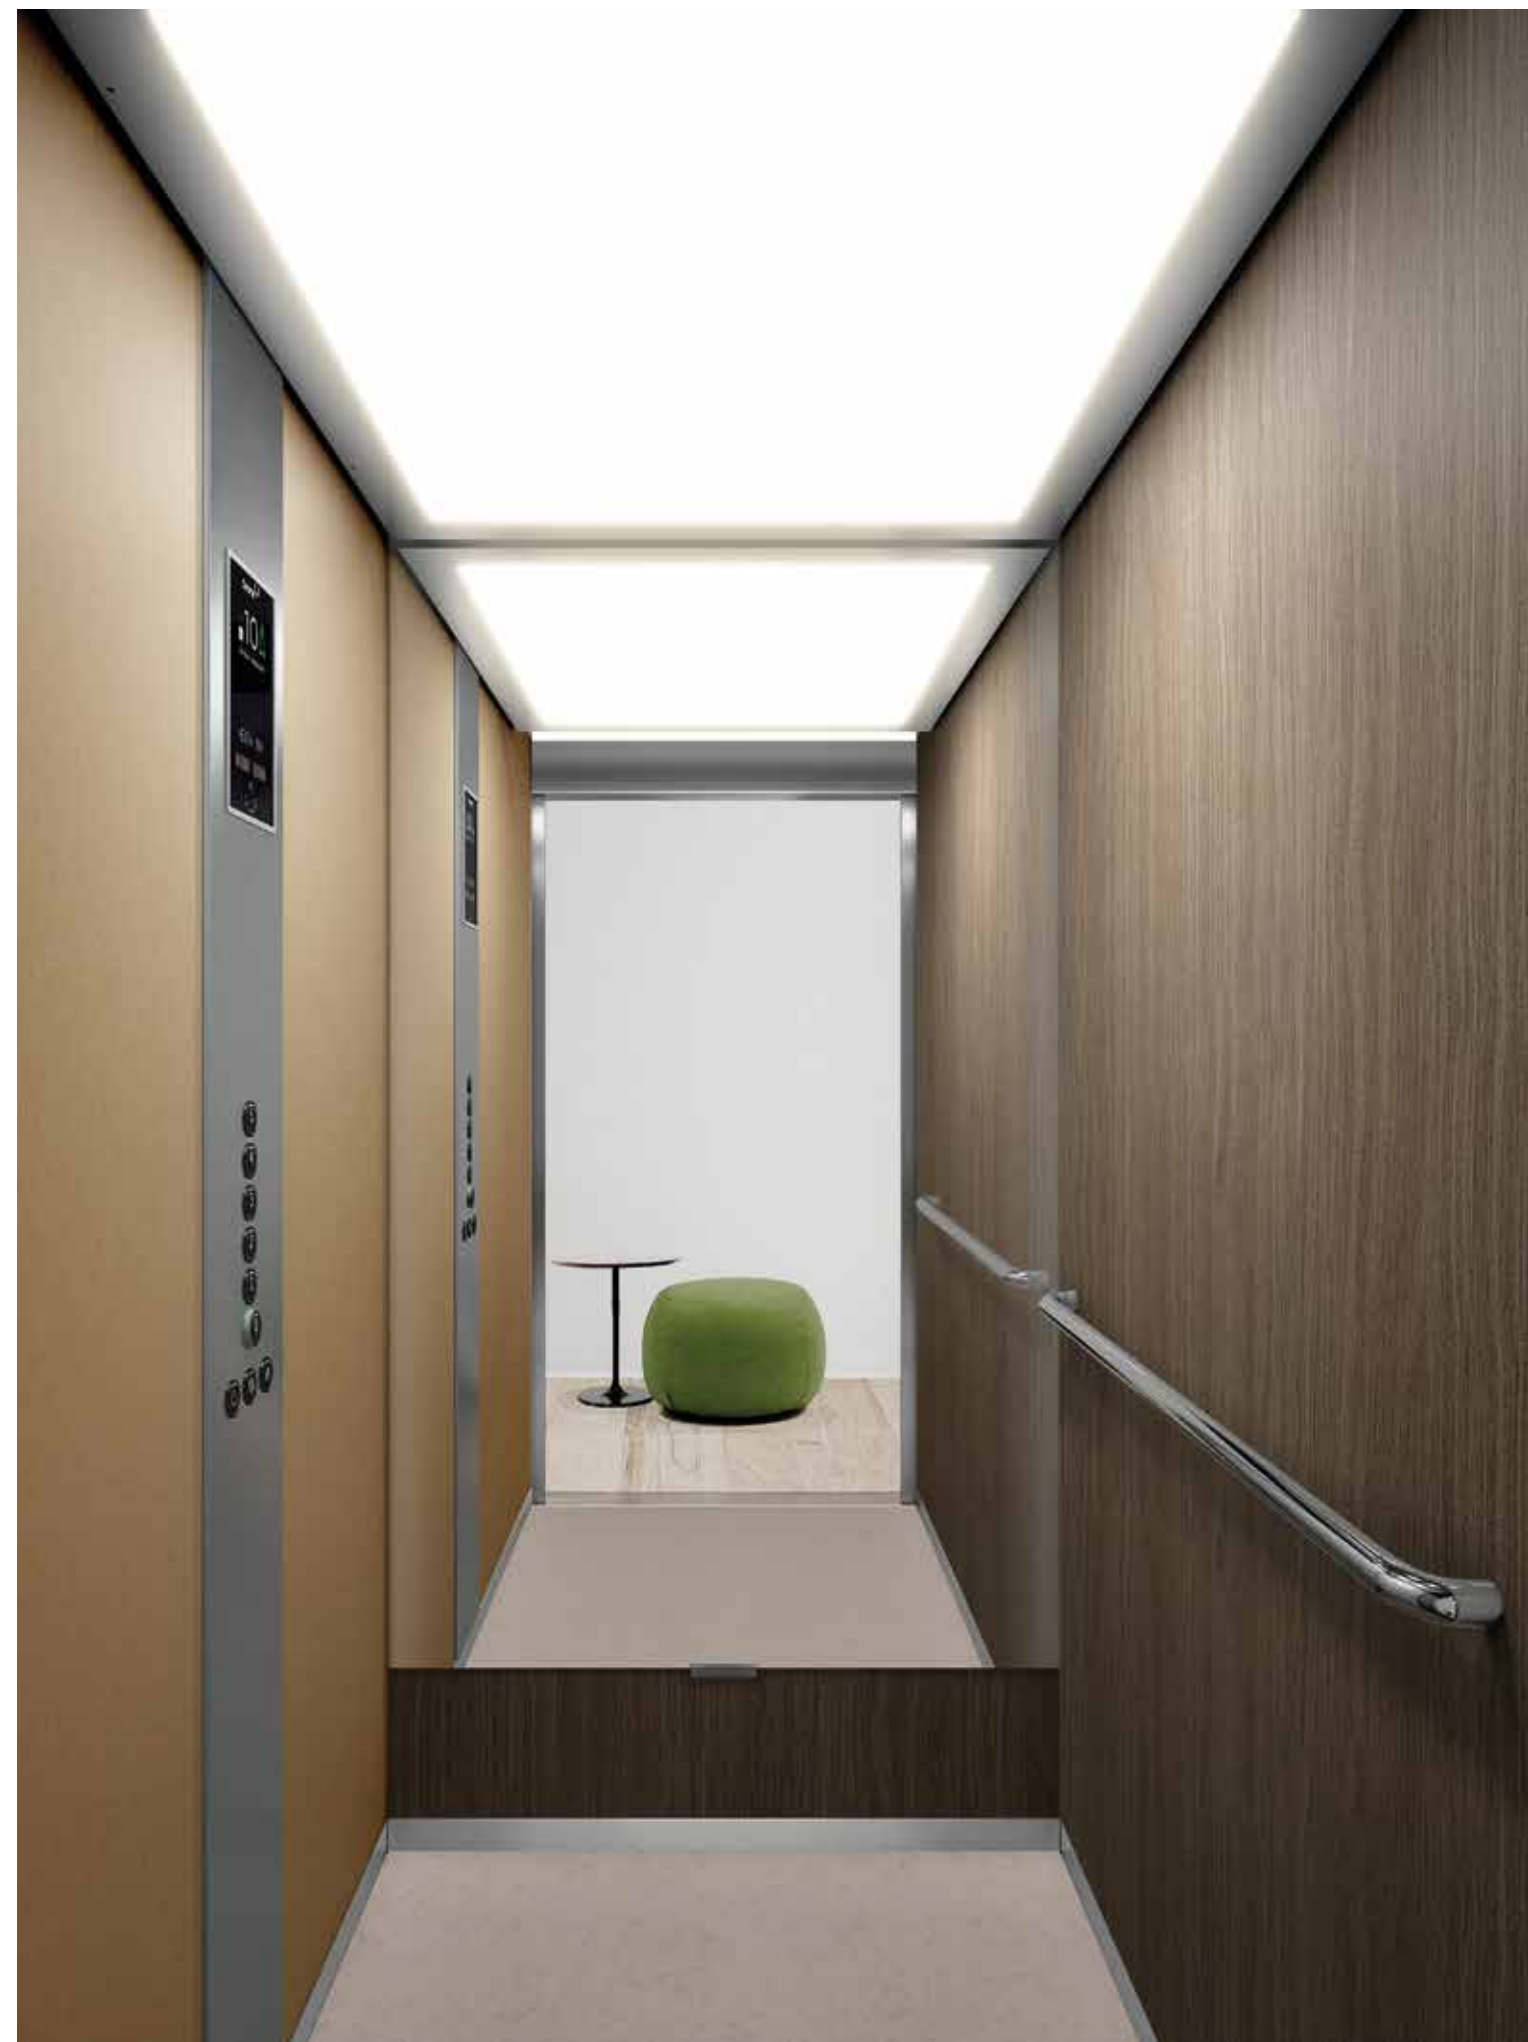

Natural balance

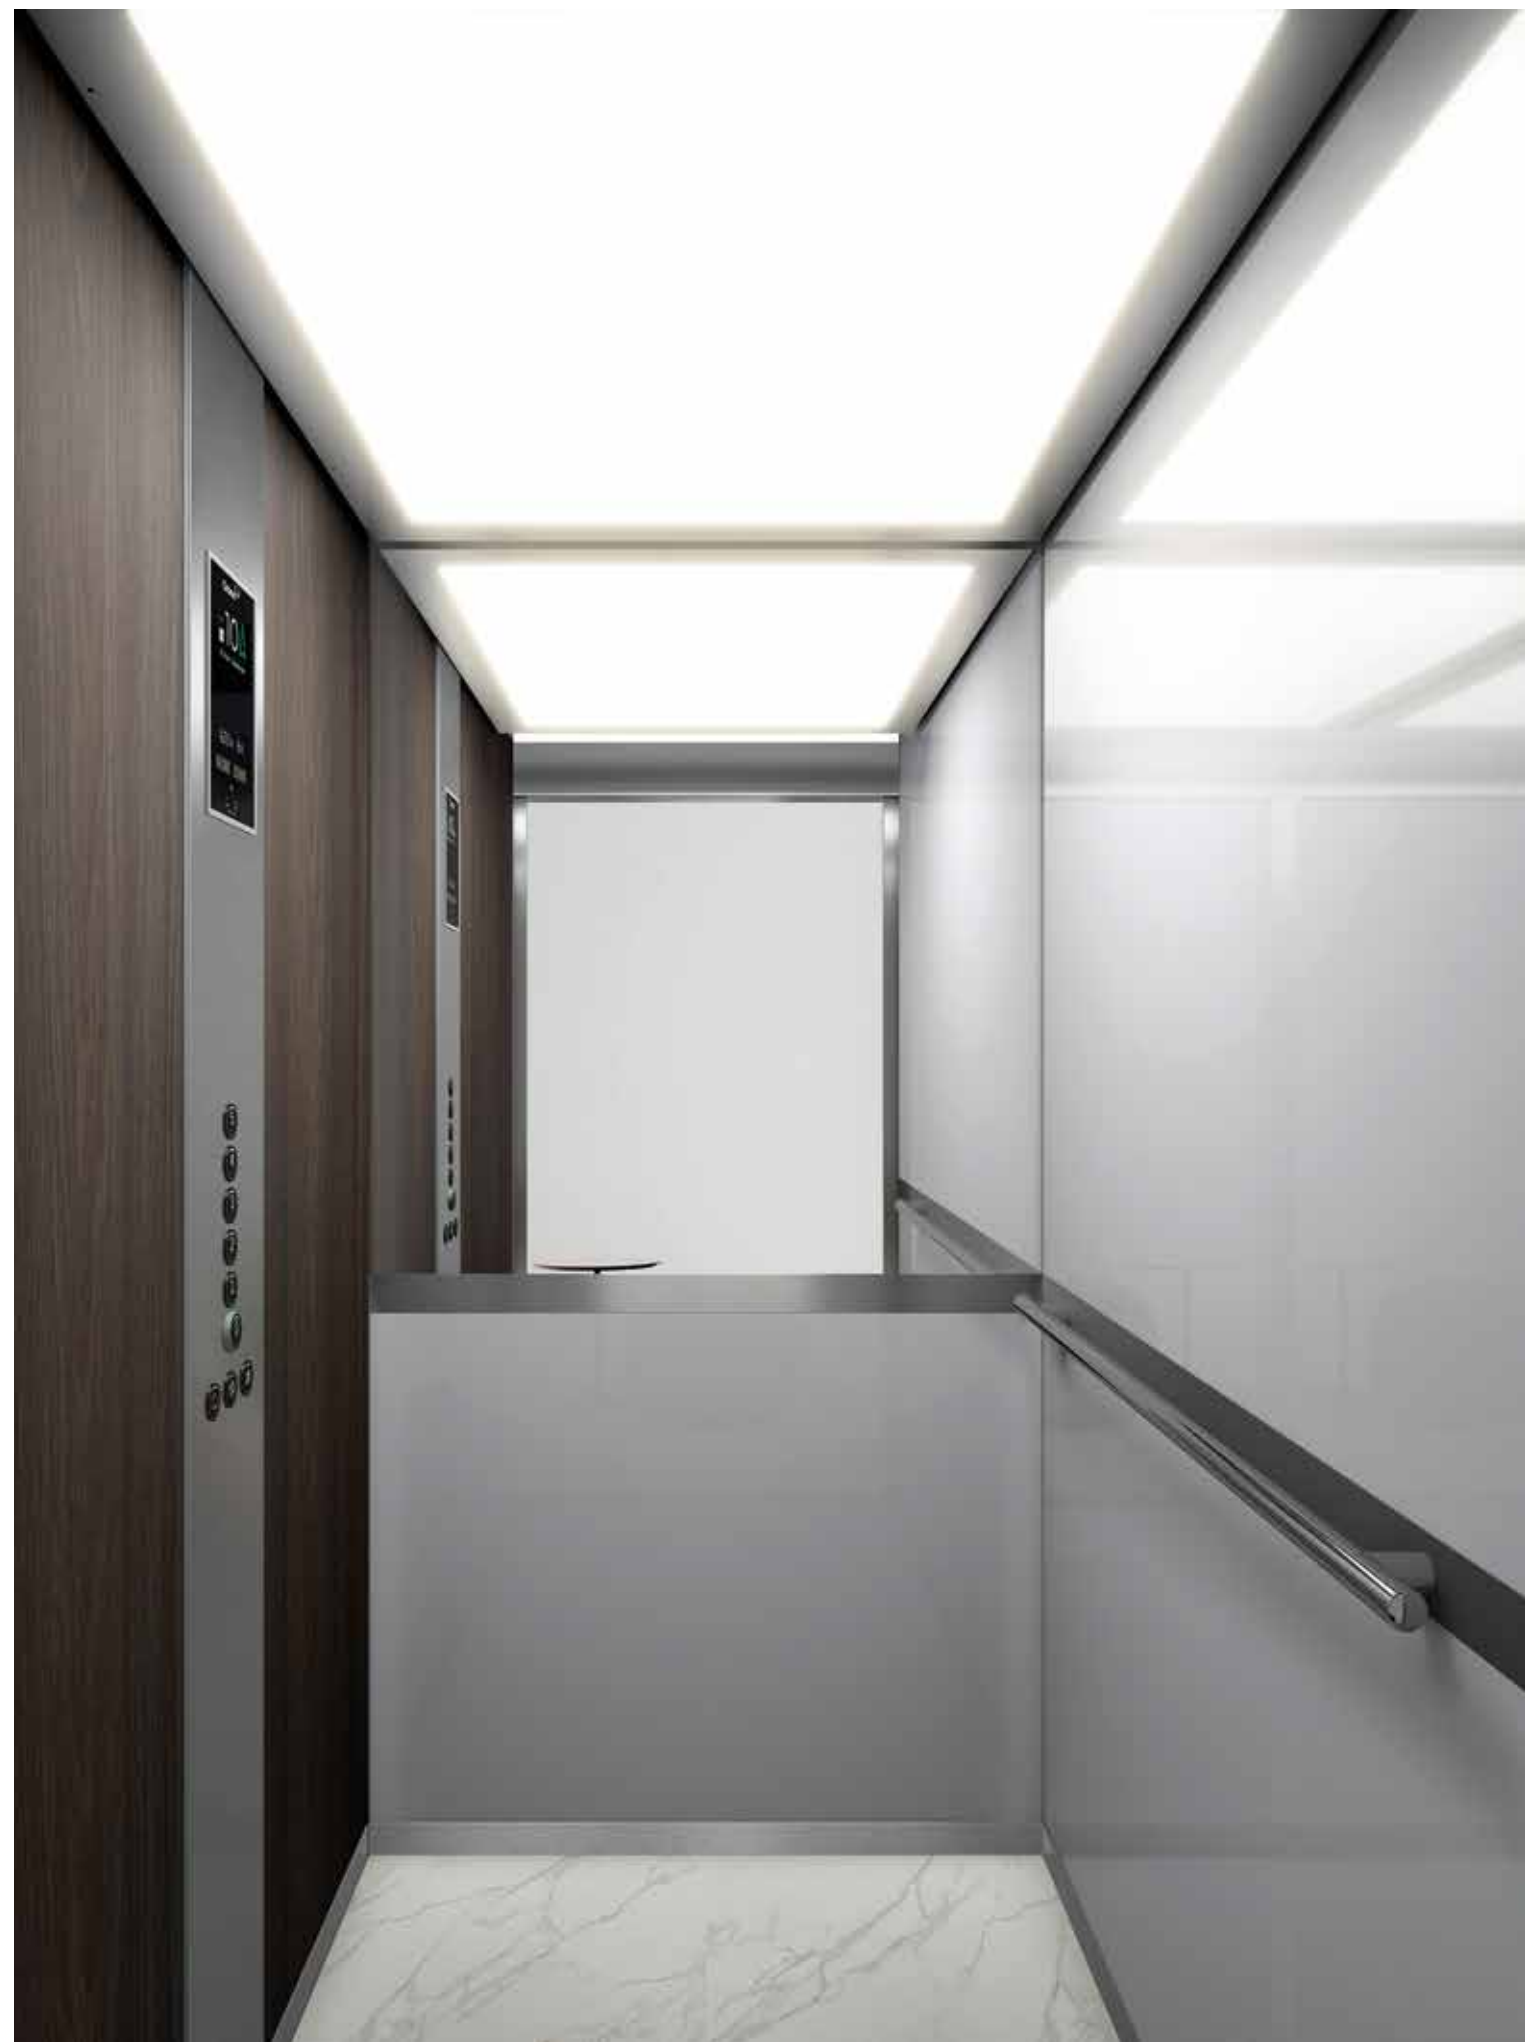

Warm tones, organic textures and an enveloping serenity. A space that breathes calm and accompanies without imposing itself.

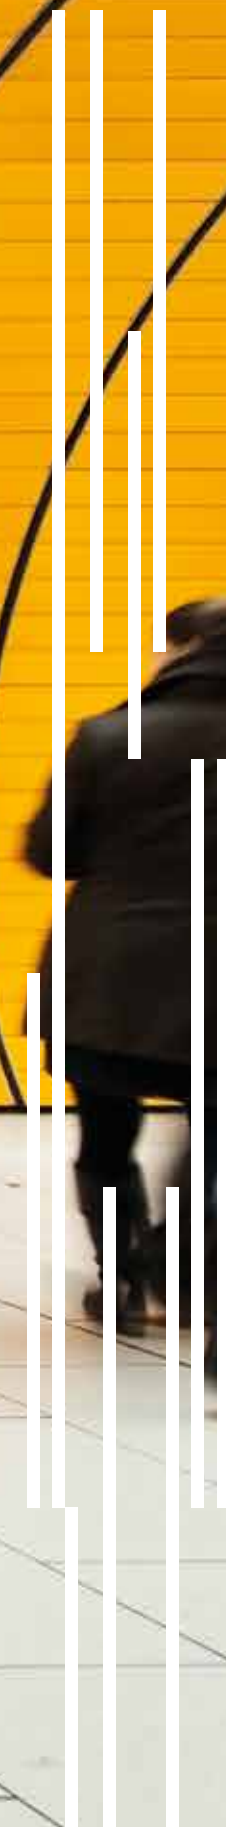

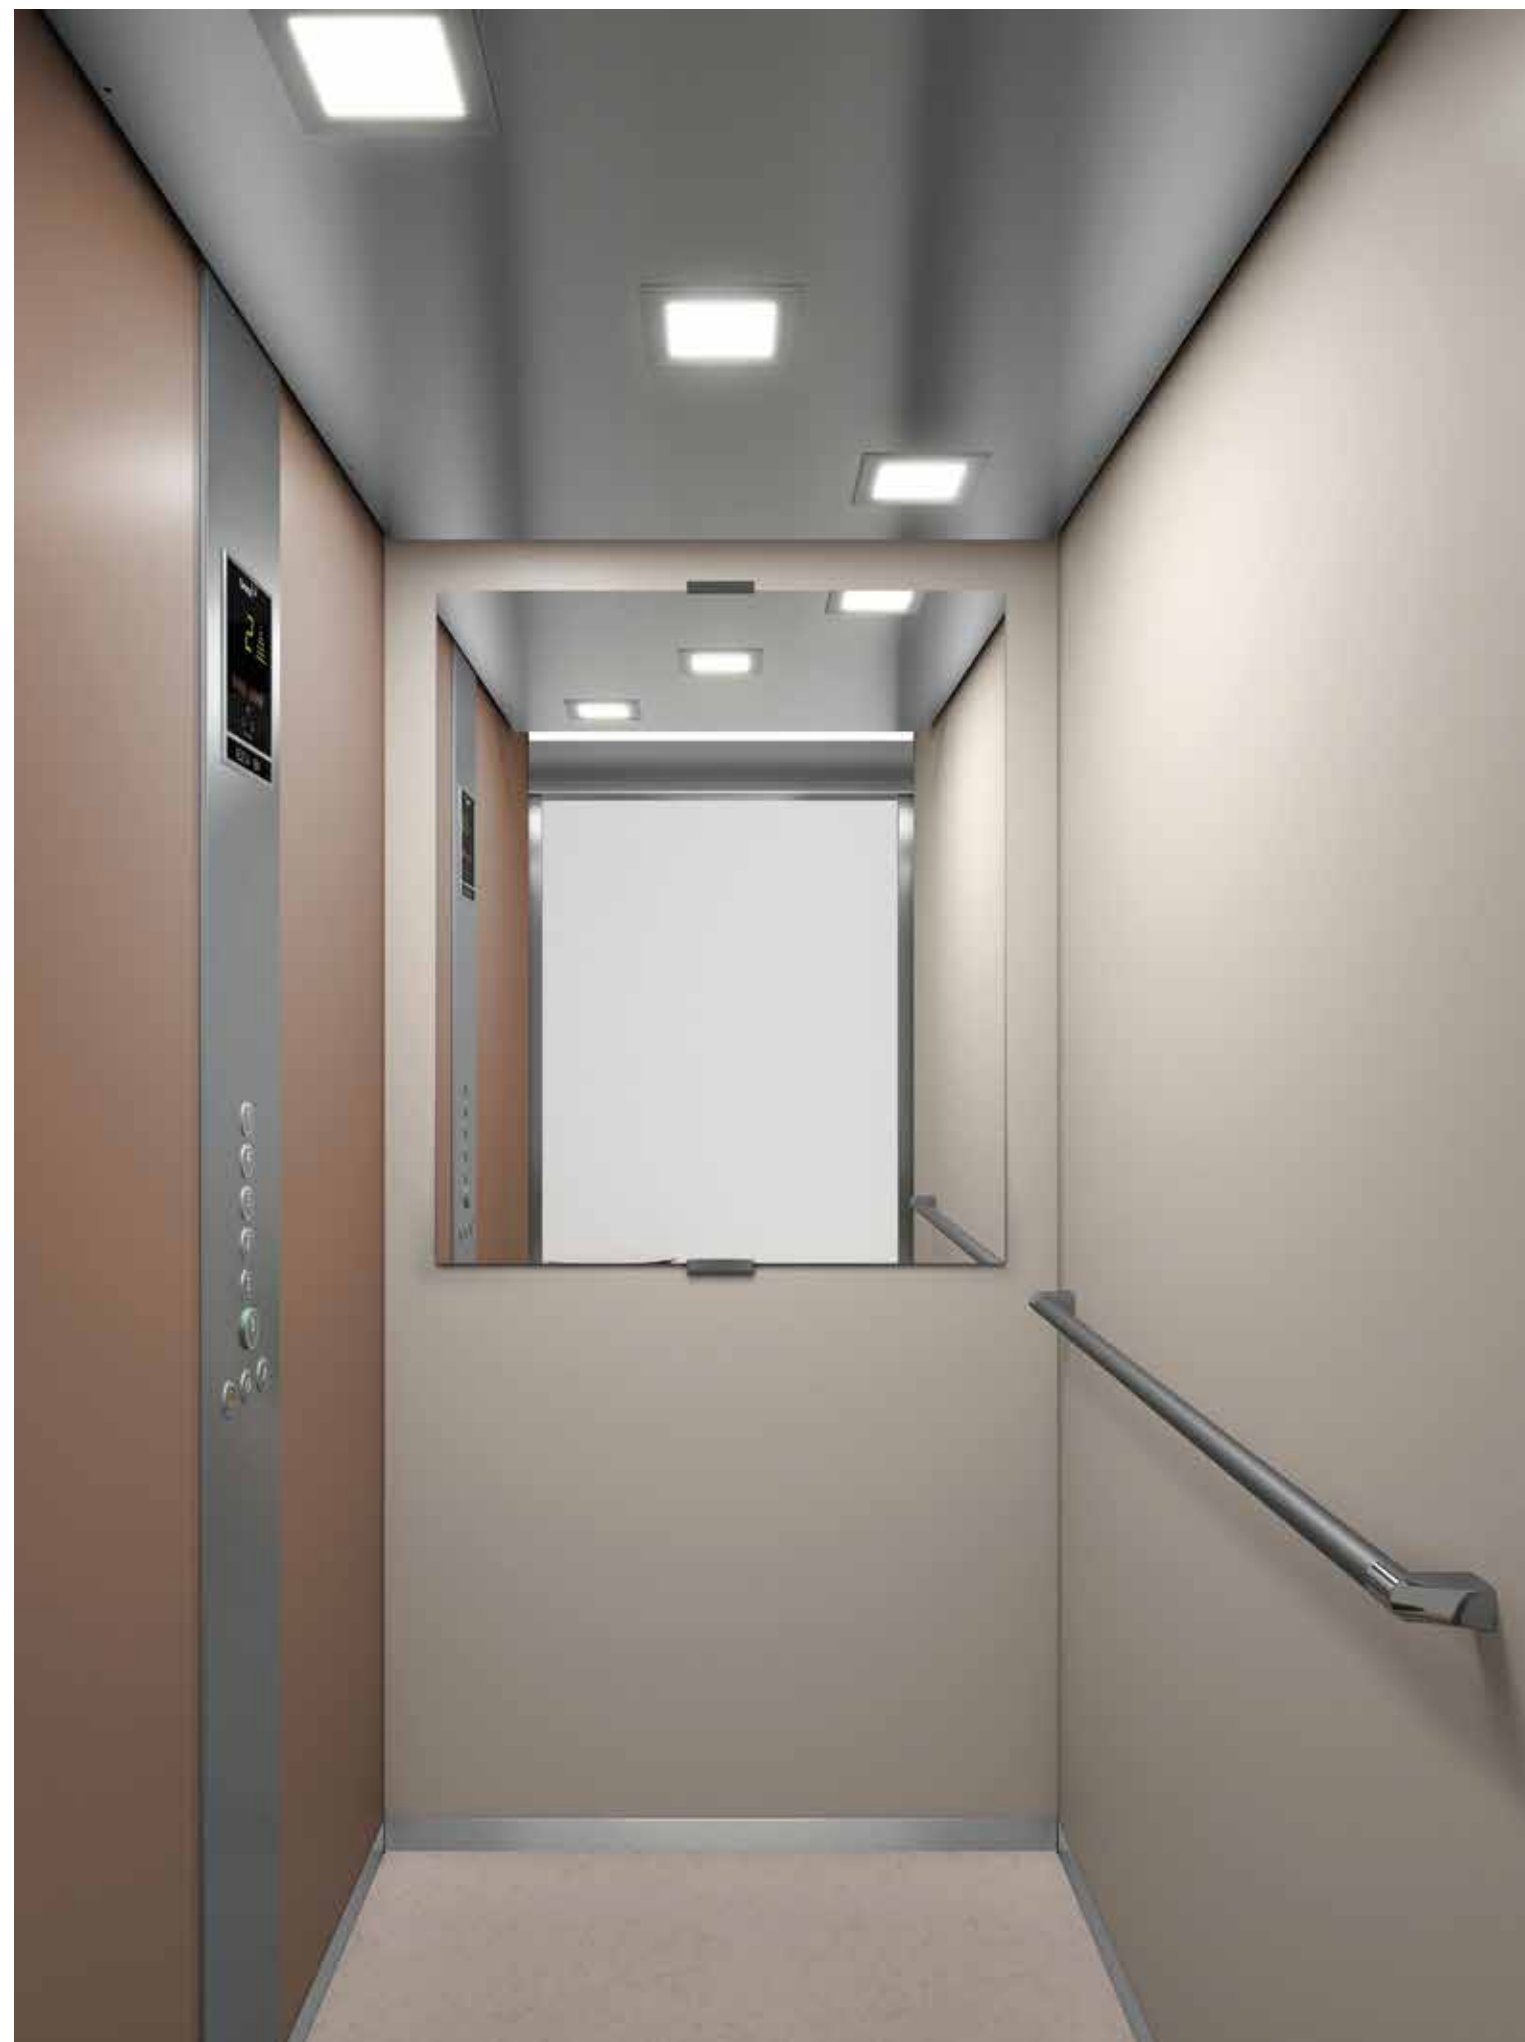

INNOVA

Innovation with character

Dynamism, energy and a contemporary aesthetic. A lift designed to add character and project an innovative vision of space.

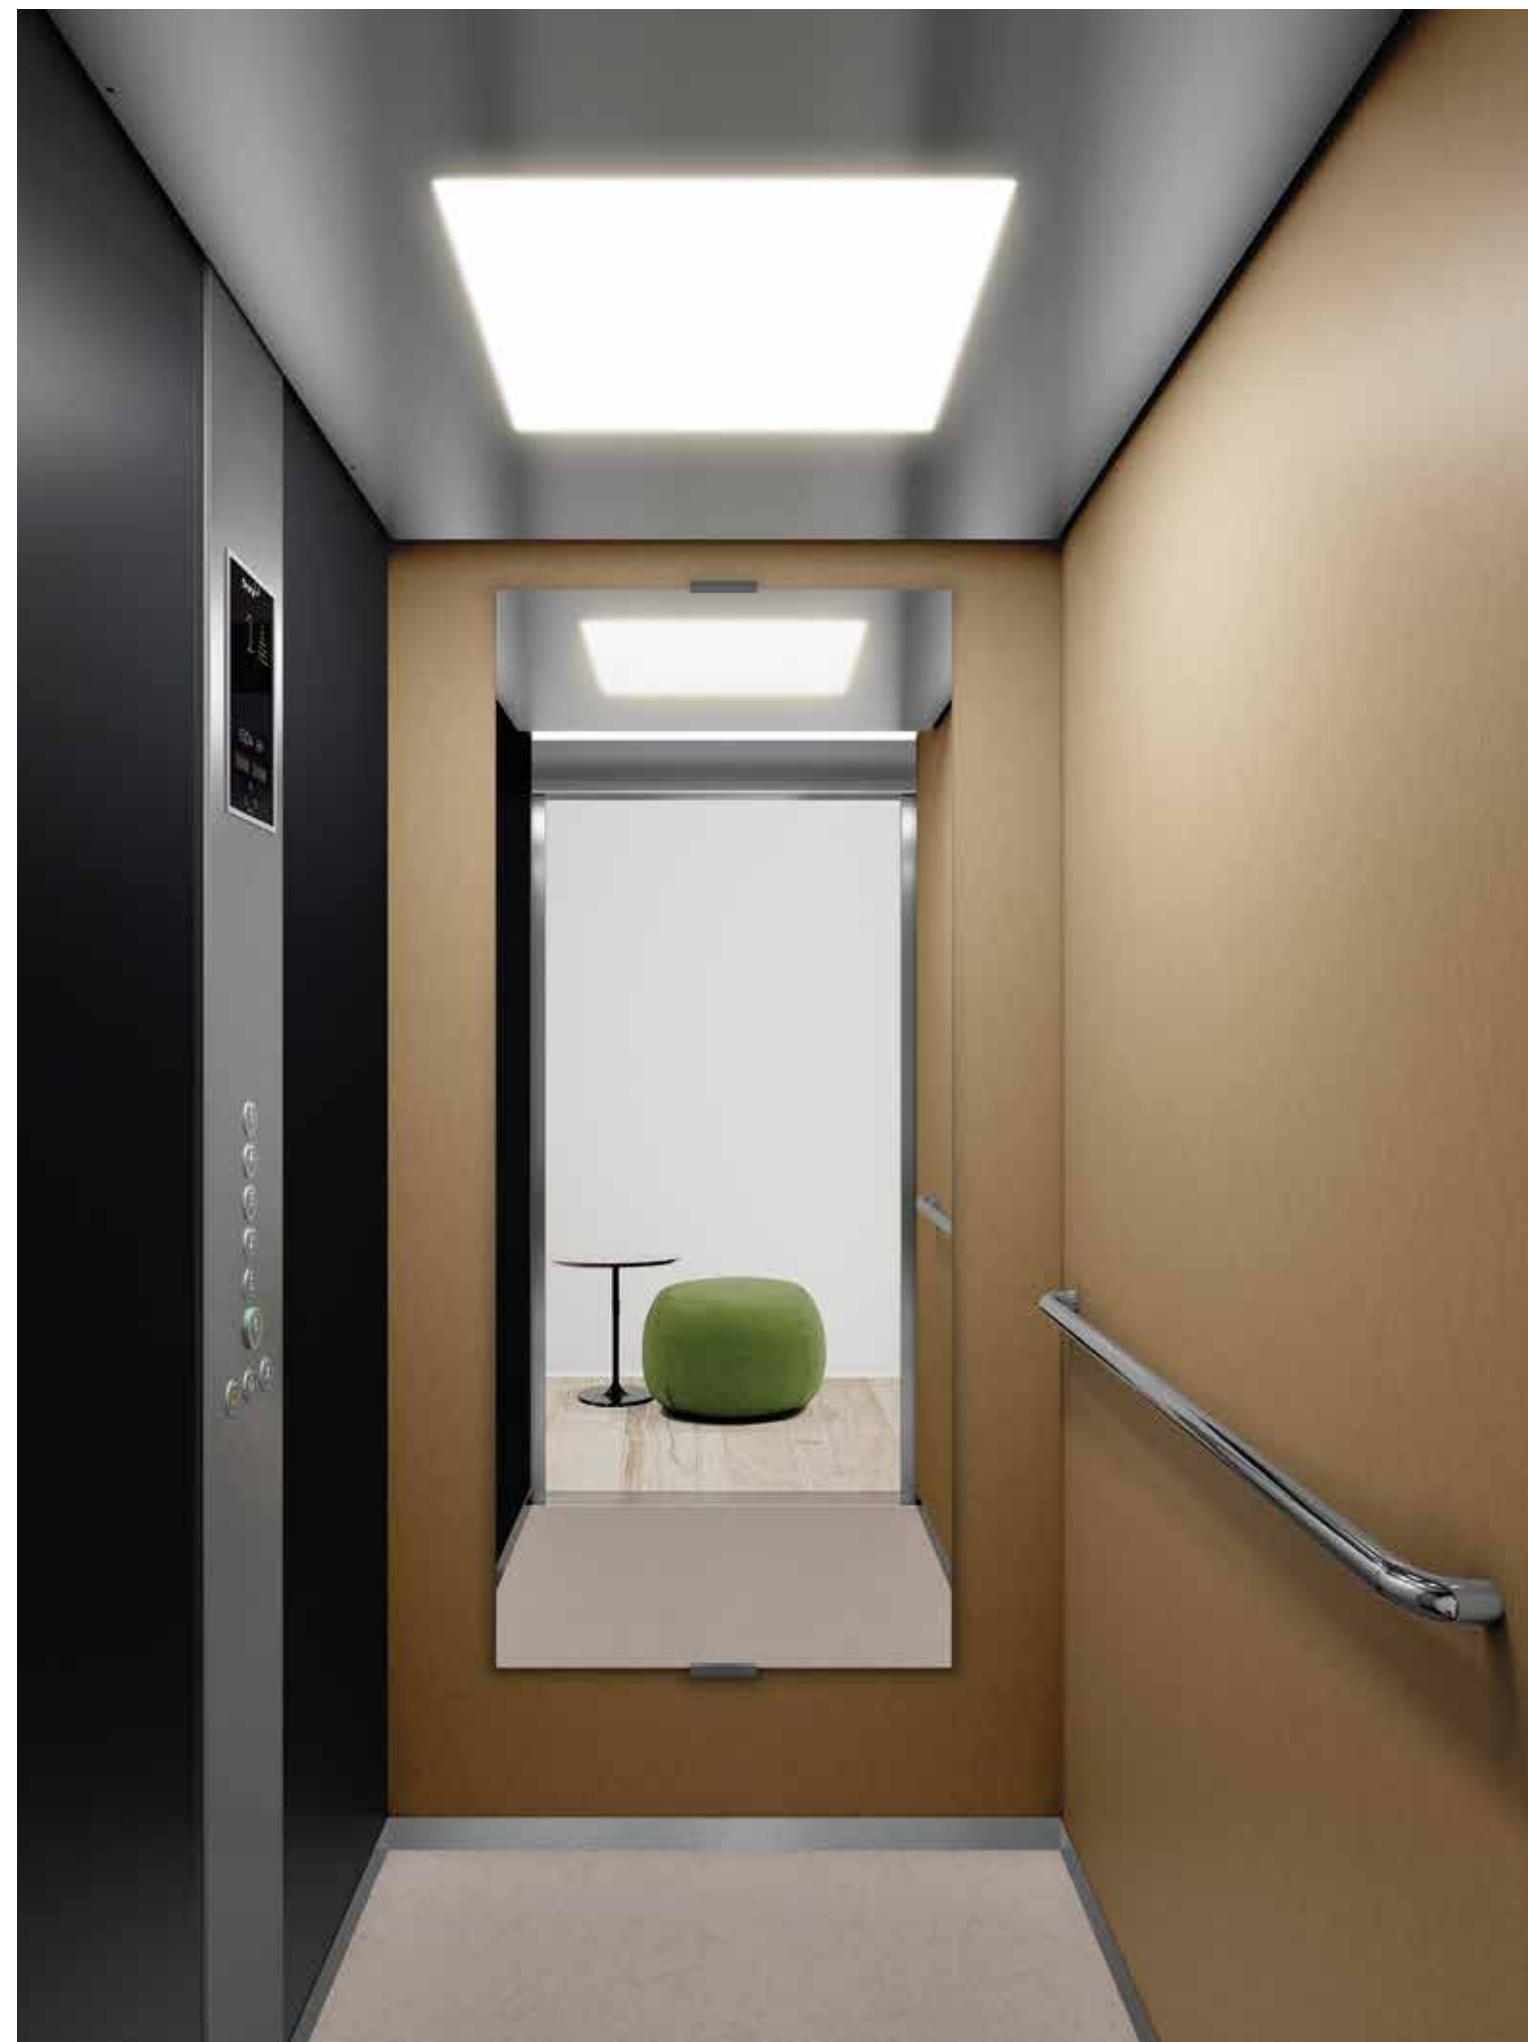

RINACCIA

Expressive sophistication

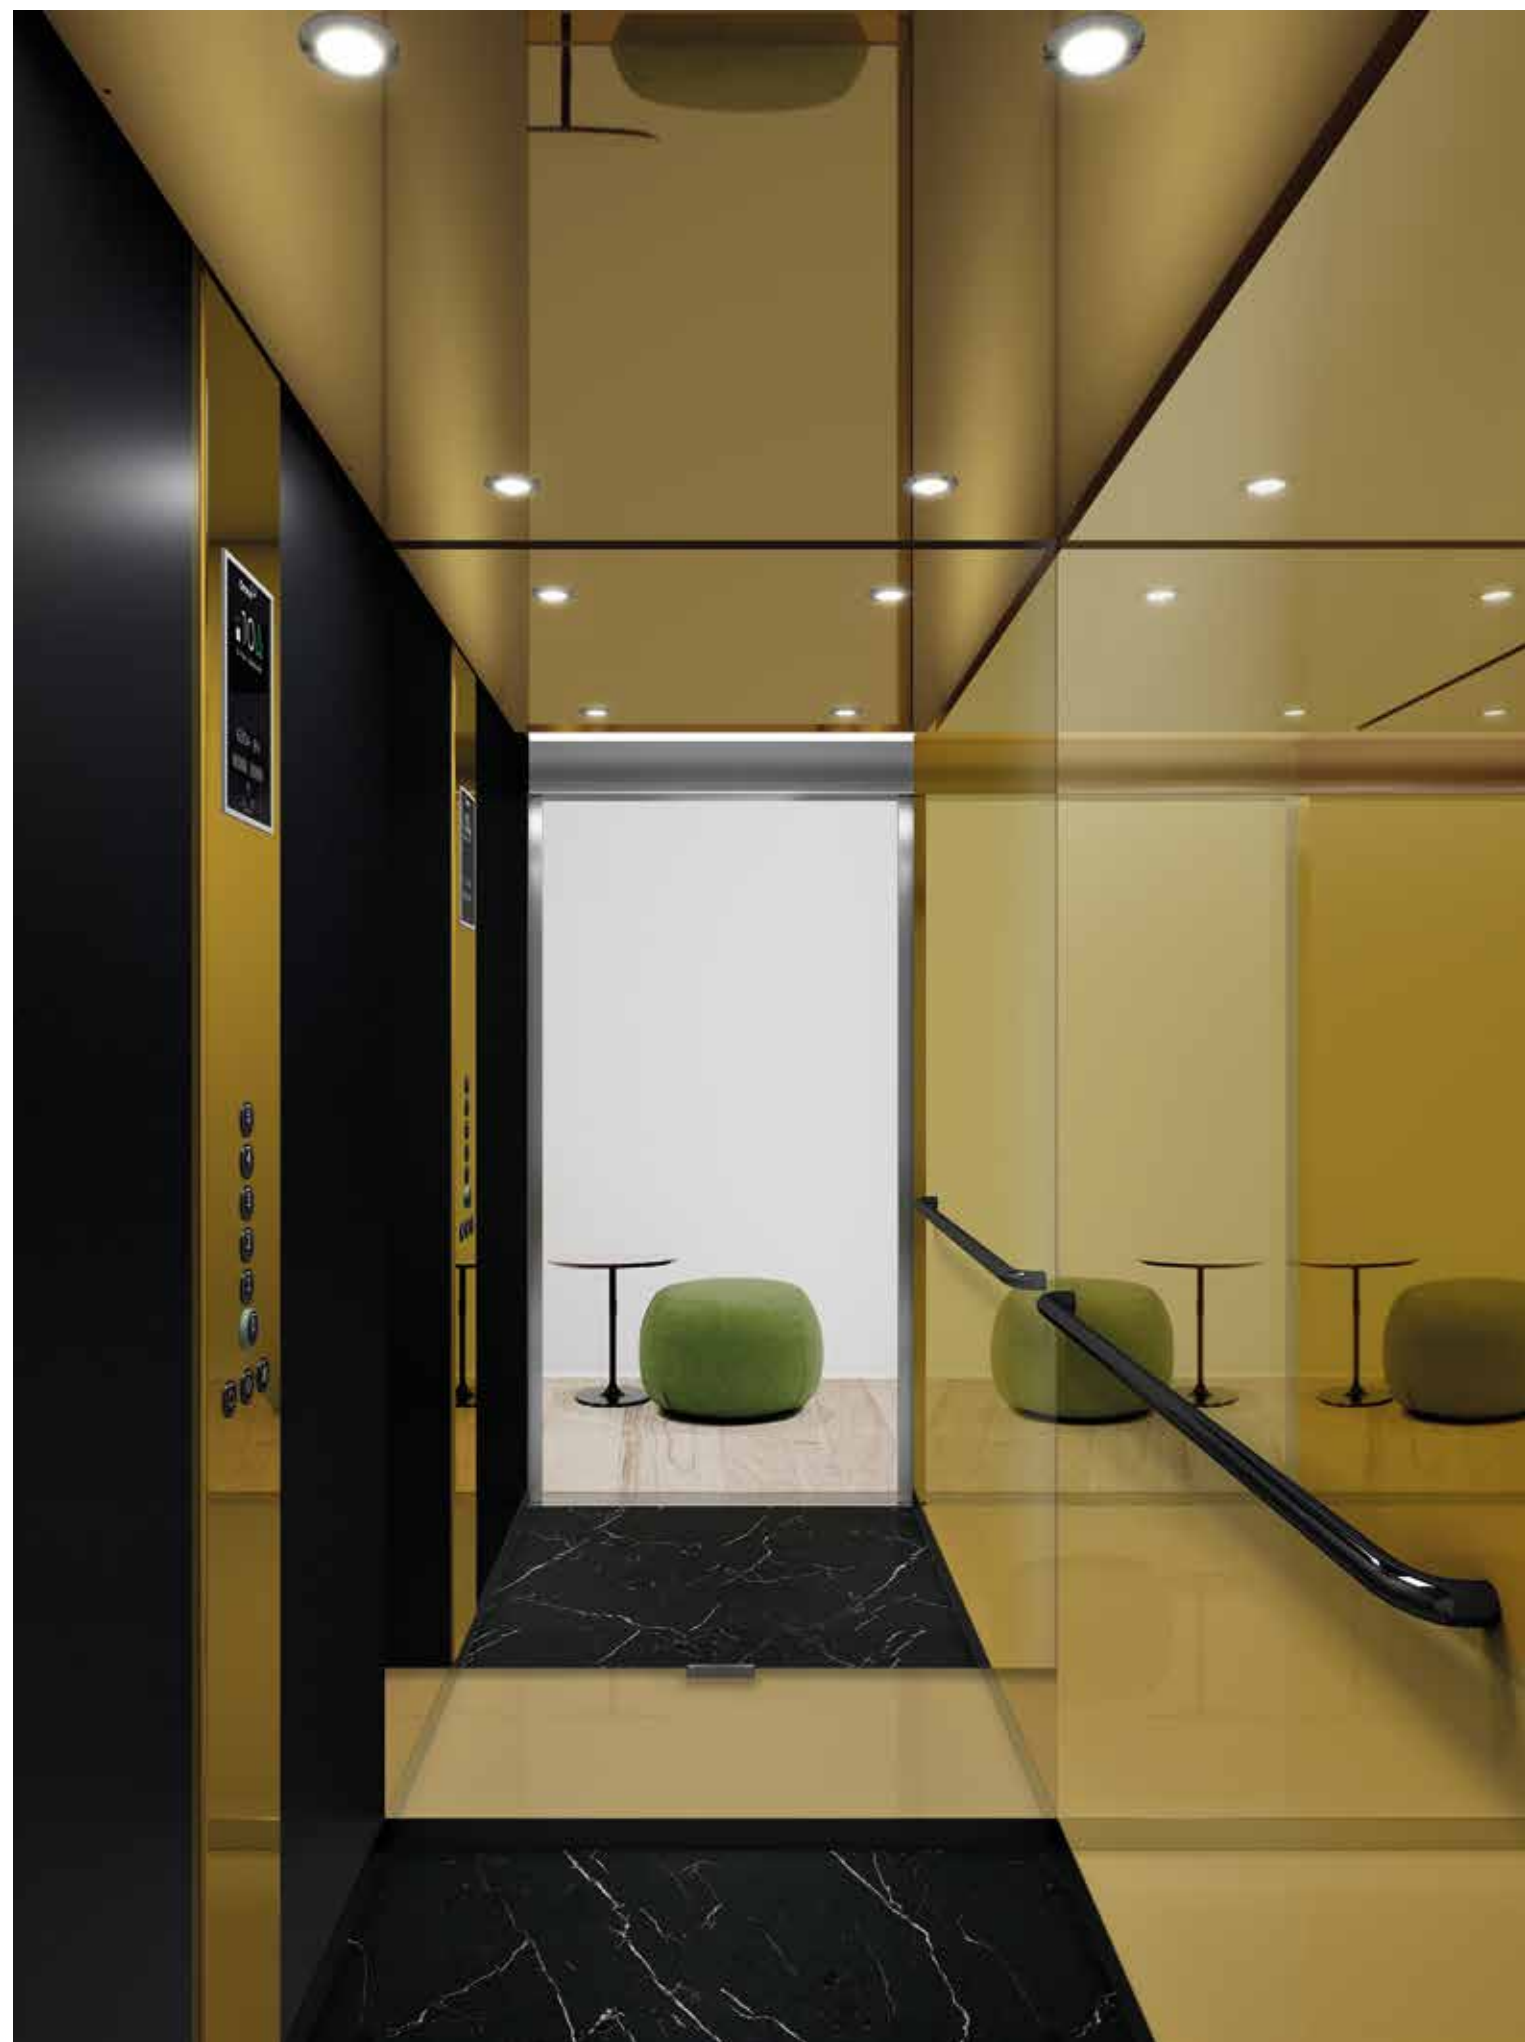

Contrasts, character and presence. An ambiance that leaves a lasting impression and turns every journey into an aesthetic statement.
